

# MAG-DRO®

## MAGNETIC CALIPER BASE

Product Specification Sheet • August 2011

### PRECISE MEASUREMENTS MADE FAST!

MAG-DRO's Caliper Base is a magnetic device used to fix calipers easily to any flat, unpainted steel work surface for quick and accurate adjustments to machines, such as table saws, planers, and routers (using an angle plate). MAG-DRO enables fast and precise measuring using a fixed point. With virtually unlimited application in the shop, MAG-DRO reinvents the capabilities of calipers.

**MADE IN THE USA**

*Picture represents actual size of Caliper Base, steel plate, and screws*

### FEATURES

- Fits most six-inch calipers
- Make a height gauge (steel plate and 4 screws included)
- Digital accuracy available to the hobbyist woodworker
- Quickly connect and disconnect calipers from base
- Adaptable to many applications
- Small size and magnetic - Easy to store and retrieve

### BENEFITS

- Precise measurements - easier and faster
- Save time in the shop, faster more accurate set-ups
- Adjust your cuts in .001 of an inch
- Affordable

*Calipers not included*
